PROFILE

Software Engineer with 4+ years of experience designing and building scalable backend systems, full-stack web applications, and cross-platform software. Strong expertise in C++, C#, .NET, and modern JavaScript frameworks (Nuxt.js). Experienced in distributed systems, Linux environments, database optimization, containerized deployments (Docker), and observability (ELK Stack). Proven ability to deliver production-grade systems in both team environments and independent freelance projects. Comfortable working in fast-paced, remote-first environments.

WORK EXPERIENCE

Fluxudio | 2024-2026

Software Engineer

- Designed and developed scalable backend services using C# (.NET) and Ruby.
- Built full-stack web applications using Nuxt.js.
- Implemented ELK Stack for centralized logging and system monitoring.
- Containerized applications using Docker for consistent deployments.
- Integrated AI agents into production systems to enhance automation and workflows.

Achievement: Designed and implemented an AI-assisted backend system that automates repetitive operations and improves decision-making.

Datall | 2021-2024

Full Stack Developer

- Developed high-performance systems using C++ and Qt/QML.
- Designed and optimized database systems using PostgreSQL and Cassandra.
- Worked in Linux-based environments focusing on performance and reliability.
- Improved system architecture for scalability and maintainability.

Achievement: Rebuilt core modules in C++ with optimized memory and database access patterns.

Arrap Startup | 2019-2021

Android Developer

- Developed Android applications using Java.
- Built backend APIs using Laravel (PHP) and MySQL.
- Automated internal processes using Python scripting.
- Delivered end-to-end mobile + backend solutions.

Freelance Software Developer | 2017-Present

Freelance

- Built full-stack web applications using C#, Nuxt.js, and JavaScript.
- Developed and deployed multiple WordPress websites for clients.
- Customized themes, plugins, and backend functionality.
- Delivered full project lifecycle: requirements -> development -> deployment -> maintenance.

SKILLS

Programming Languages: C++, C#, Python, Java, JavaScript, PHP, Ruby, SQL

Backend & Frameworks: .NET (Core/5+), Laravel, REST APIs, Nuxt.js, WordPress

Databases: PostgreSQL, MySQL, Cassandra

DevOps & Tools: Docker, Linux (Ubuntu, Fedora, Manjaro, openSUSE), Git, ELK Stack

Engineering Focus: Backend Architecture, Performance Optimization, System Design, API Development, AI integration

LANGUAGES

Persian (Fluent) · Kurdish (Fluent) · English (Intermediate) · Spanish (Basic)

EDUCATION

B.Sc. Software Engineering — University of Tehran
2017-2021

Top student (3x recognition)

Teaching Assistant (14 semesters)

GPA: 3.77 / 4.0
